BACKGROUND:

In general, this project will consist of replacing an existing undersized storm sewer system with a larger capacity storm system in W. Abriendo Avenue from Lincoln Street to the storm system outfall at the Arkansas River along Boulder Avenue. Improvements will help mitigate frequent flooding events in this area and will include approximately 1,650 LF of 60" storm sewer, installation of new manholes, inlets, laterals, water quality and open channel improvements related to the construction as detailed in the plans and specifications for this project.

BOARD/COMMISSION RECOMMENDATION:

None.

STAKEHOLDER PROCESS:

None.

ALTERNATIVES:

Alternatives No. 1 – No action

Under this alternative, the existing storm sewer system that outfalls along Abriendo Avenue and Boulder Avenue would remain undersized and would continue to surcharge during large storm events causing flooding of adjacent properties and public roadways, safety hazards, possible monetary damage, and costs to repair the damage.
