

# Home Safety Tips

If you haven't installed one already, have you considered adding a door viewer, AKA peephole) to enhance your overall safety and security? Instead of opening your door to a complete stranger, adding a wide angle, 180-degree door viewer to your exterior door(s) could be a great inexpensive option.

If you're looking at taking it a step further you could also purchase door viewer cameras and/or doorbell cameras to avoid opening your door to unwanted strangers.

## SAFETY OPTIONS TO CONSIDER:

- Don't open your door for strangers or allow them into your home
- Speak through the door, locked storm door, or doorbell camera system
- Keep doors locked to include deadbolts
- Consider the addition of a door chain (use longer screws than those supplied for additional security)
- Inform people who claim distress that you will call the police for them
- Add "No Solicitor" stickers to your front door to prevent unwanted guests
