

## Cultural Resource Re-Visitation Form

Resource Number: 5PE5520

Temporary Resource Number:

### 16. Known Collections, Reports, or Interviews:

Industrial Utopia: The History and Architecture of South Pueblo. Prepared by Jeffrey DeHerrera, Adam Thomas, and Cheri Yost of HISTORITECTURE, LLC for the City of Pueblo, Colorado. Certified Local Government Grant Project CO-10-022. July 2011.

I-25 New Pueblo Freeway Improvement Project. Architectural Resources Survey Report. Pueblo County, Colorado. Prepared by the Colorado Department of Transportation. February 2009.

### 17. Site Description/Update:

The 2008 survey of the neighborhood for the I-25 New Pueblo Freeway Improvement Project identified the current potential historic district boundaries. That survey encompassed three smaller potential historic districts identified as part of a 1981 Pueblo Regional Planning Commission survey. Those smaller districts are the West Corona Park Historic District (5PE532), the East Corona Park Historic District (5PE545), and the portion of the Carlile Place Historic District (5PE534) located east of Abriendo Avenue. The 2008 survey boundary of the Corona Park Potential Historic District encompasses the entirety of the historic neighborhood known as Corona Park or "The Blocks," and subsumed the three smaller potential districts into the larger boundary of the new Corona Park District.

State Highway 96, designated s West 4<sup>th</sup> Street through the Corona Park Historic District, bisects the neighborhood. However, due to its separate period of significance and historic context, the highway and its right-of-way is not a contributing feature of the district.

Corona Park sits atop a bluff overlooking the channelized Arkansas River. The steep slopes of the bluff are undeveloped, with the exception of the Arkansas River Trail, which follows the river along the base of the bluff between W. 4<sup>th</sup> Street and Runyon Lake. Two locations in the Corona Park neighborhood allow access down to the trail. One is at the north end near W. 4<sup>th</sup> Street (State Highway 96) and is accessed via Chapa Place or Pearl Street, and is a wide gravel road with a parking area at the base of the bluff. The other is near Main Street and is accessed via East Corona Avenue, with a parking area at the top of the bluff and a path leading down to the trail.
