

**Fire Department  
Internationally Accredited Agency**

Greetings,

You may have received a notification letter with the following sender's address:

**PUEBLO CITY FIRE DEPARTMENT  
4845 PEARL EAST CIR STE 118  
PMB 47649  
BOULDER, CO 80301-6112**

This is a legitimate notification that has been generated through our Compliance Program Partner, BRYCER.

The Pueblo Fire Department has instituted a new process for service providers who inspect and test fire protection systems. Effective **06/15/2024** all compliant and non-compliant fire protection systems test reports are required to be sent to the Pueblo Fire Department electronically by those service providers via The Compliance Engine's online system at [www.thecomplianceengine.com](http://www.thecomplianceengine.com).

All fire protection systems on record, installed in buildings within our jurisdiction, are subject to this requirement, and any system that has not had an inspection report submitted to this program by **05/15/2025** will be flagged for renewal.

Property owners or their designated representative will receive timely proactive notifications of their testing requirements. This notification is designed to be a reminder to the designated individual to take immediate steps to schedule an inspection of their fire protection system by a qualified service provider.

- If your fire protection systems have recently been inspected and tested by a service provider, and you have received a notification letter, please contact one of our Fire Inspectors directly to discuss the next course of action.
- If you need to find a service provider...

Please follow the link below in order to begin your search for a service provider that is certified to inspect and test fire protection systems in Southern Colorado.

*(Disclaimer: This website may not include some local certified service providers.)*
